

Augmented Philosophy and the Modeling of Consciousness in the Age of AI
Overview of Research Work (2003 - ...)
Jean-Charles Tassan

For over twenty years, my research has explored the intersections of philosophy, artificial intelligence, cognitive psychology, and mathematics. My aim is to understand how humans model knowledge and consciousness, and how these models influence and are influenced by our relationship to technology and ourselves. This document offers a coherent overview of my major publications and references, following a guiding path: from meaning to the machine, and from the machine back to meaning.

Vision

- 1) Augmented philosophy: connecting classical thought with contemporary AI challenges.
- 2) Modeling of meaning: the issue is not what we live, but how we represent and understand it.
- 3) Machine consciousness and empathy: toward an ethics of AI rooted in phenomenology and psychology.
- 4) Human machine balance: rethinking the place of humanity in a world of complex technical systems.

1. 'Ethical Leviathan' Series

Ethical Leviathan (1) : [Heidegger & Husserl - The philosophy of personification of things.](#)

<https://tinyurl.com/Leviathan-Ethique-1>

Ethical Leviathan (2) : [Chomsky & Piaget - From the misunderstanding of a concept to pedagogical renewal.](#)

<https://tinyurl.com/Leviathan-Ethique-2>

Ethical Leviathan (3) : [Jung & Kant - From individual to collective consciousness.](#)

<https://tinyurl.com/Leviathan-Ethique-3>

Ethical Leviathan (4) : [Kierkegaard & Levinas - The philosophy of the AI black box.](#)

<https://tinyurl.com/Leviathan-Ethique-4>

Ethical Leviathan (5) : [Descartes & Heidegger - Grothendieck topoi in philosophy.](#)

<https://tinyurl.com/Leviathan-Ethique-5>

Ethical Leviathan (6) : [Heidegger & Descartes - Representational scales in AI.](#)

4. Academic Background

Executive Master in Artificial Intelligence Institut Mines-Telecom (2021-2023)

National Teaching Certificate in Mathematics (CAPES 2018)

Masters Degree in Philosophy, Psychology & Scientific Modeling UCLy (2011-2012)

ESC Pau Business School Strategy & Finance (2003-2006)

Level C1 in English
